Pediatr Cardiol 21:609–616, 2000
DOI: 10.1007/s002460010139

Subject Index

CR—Case Report; LE—Letter to the Editor; A—Annotation

Absent pulmonary valve, valve cusp created from pulmonary artery wall corrected (CR); 487
Adenovirus myocarditis, high-dose intravenous immuno globulin decreases cardiac troponin I in (CR); 391
Adolescents, aortic regurgitation in HLA B27-associated rejuvenile arthritis in; 141
colchicine prevents recurrences of corticosteroid-dependent idiopathic pericarditis in (CR); 395
MRI measurements of cardiovascular structures in; 37
PVC MRI measurement of pulsatile blood flow in; 104
thrombolysis of prosthetic tricuspid valve thrombosis with recombinant tissue plasminogen activator in (CR); 397
Adrenomedullin, myocardial preservation and; 228
Age, effect on QT variability; 411
effect on right ventricular myocardial performance index; 416
Aged face appearance, intrauterine growth retardation and Johanson-Blizzard syndrome and (CR); 389
Ambulatory electrocardiographic recording, of HIV-infected children, rhythm and conduction abnormalities in; 189
Amplatzer duct occluder, left ventricle to descending aorta conduit closed using (CR); 180
Amplatzer septal occluder, 3D transesophageal echocardiography vs. balloon sizing for atrial septal defect measurement for size of; 465
Angiocardiography, radionuclide, ventricular function in pulmonary insufficiency measured by; 244
Angiography, drainage sites in TAPVC identified by (CR); 289
normative data on cardiovascular structures obtained by; 37
selective coronary, in pediatric patients, techniques and complications of (CR); 285
Angioplasty, percutaneous pulmonary artery gene transfer in pigs with plasma DNA delivered during; 223
Antiarrhythmic drugs, role in management of arrhythmias in children; 576
Anticoagulants, monitoring of (A); 373
Anticoagulation therapy, evaluation of prothrombin time/international normalized ratio (PT/INR) monitor in children using; 347
Aortic origin of right pulmonary artery, preoperative management of right ventricular dysfunction in (CR); 388
Aortic regurgitation, factors affecting exercise capacity of pediatric patients with; 328
HLA B27-associated juvenile arthritis and; 141
Aortic size, MRI assessment of normal range of values of; 37
Aortopulmonary septal defect, truncus arteriosus communis and (CR); 477
Arrhythmias, catheter ablation concepts and surgical therapy for; 576
electrocardiograms for diagnosis of; 516
from long QT syndrome, sudden cardiac death caused by; 542
pharmacologic management of; 508
prior therapies an radiofrequency catheter ablation for; 508
ventricular, prognostic and therapeutic considerations of and prevention of sudden cardiac death from; 532
Arrhythmogenic substrates, radiofrequency current ablation for tachycardias based on; 557
Arterial switch operation, positron emission tomography evaluation of myocardial perfusion after; 111
Atrial fibrillation, marijuana use and (CR); 284
Atrial natriuretic peptide, in children with congenital heart disease, correlation with cardiac index; 378
Atrial septal defect, after balloon valvuloplasty for critical pulmonary valve stenosis, catheter closure of (CR); 170
factors in spontaneous closure of; 129
radioangioscintigraphy and Doppler echocardiography of left-to-right shunt in; 240
Tei index in normal children and children with; 416
three-dimensional transesophageal echocardiography vs. balloon methods for sizing of; 465
Atrial waves, right ventricular diastolic function evaluated by; 358
Atrioventricular block, in child with diphtheria (CR); 282
Atrioventricular flow wave velocity, gestational age and; 422
Balloon angioplasty, real-time MRI used for; 80
Balloon dilatation, effect on cerebral perfusion and oxygenation; 461
of native aortic coarctation in Turner syndrome (CR); 474
of pulmonary artery band (LE); 407
Balloon sizing methods, atrial septal defect size measured by; 465
Balloon valvuloplasty, for pulmonary valve stenosis, catheter closure of atrial septal defect after (CR); 170
shortening patterns of infundibulum in valvular pulmonary stenosis before and after; 448
Bernoulli equation, accuracy of in estimating pressure

gradient across stenotic modified Blalock-Taussig shunt; 439
Blalock-Taussig shunt, accuracy of Bernoulli equation in estimating pressure gradient across; 439
Bland-White-Garland syndrome, catheter intervention after mammary artery bypass stenosis and fistula development (CR); 161
Blood (bolus) tagging, MRI technique to study aortic velocity profiles; 59
Blood flow rate, in pulsatile flow phantom, PVC MRI of; 104
Body size, of premenarcheal girls, normalization of maximal cardiovascular variables for; 429
Brain natriuretic peptide, in children with congenital heart disease, correlation with cardiac index; 378
Cardiac disease, pediatric syncope and; 514
Cardiac function, MRI assessment of; 59
Cardiac hemodynamics, pediatric syncope and; 514
Cardiac index, in congenital heart disease, plasma nitric oxide products correlate negatively with; 378
Cardiac masses, in neonate with cyanosis and heart murmur (CR); 271
Cardiac morphology, Anderson et al. segmental approach to (A); 147
Baharati and Lev segmental approach to (A); 128
diagnostic coding of for computerized storage and retrieval (A); 160
terms and phrases of; 103
Tynan et al. sequential approach to (A); 140
Van Praagh segmental approach to (A); 118
Cardiac output, body surface area used to normalize maximal values of for body size; 429
Cardiac rhabdomyomas, in tuberous sclerosis, congenital heart defects associated with (CR); 165
Cardiac surgery, respiratory syncytial virus antigen screening of congenital heart disease children before; 433
Cardiac troponin I, in adenovirus myocarditis treated with high-dose intravenous immunoglobulin (CR); 391
Cardiac tumors, in infants and children, review of pathologic features of; 317
see also individual tumor entriesselected aspects of and imaging modalities for; 299
Cardiomyopathy, dilated, ventricular tachycardia and; 524
hypertrophic, ventricular tachycardia and; 524
Cardiopulmonary support, percutaneous, fulminant myocarditis treated by (CR); 158
Cardiovascular anatomy, MRI assessment of; 18
multidimensional visualization of MRI data sets of; 27
Carditis, HLA B27-associated juvenile arthritis and; 141
Catheter tracking, MR fluoroscopy for; 80
Centralization, of pediatric heart surgery in Sweden, process and reduction in mortality after; 353
Cerebral oxygen delivery, effect of balloon dilatation on; 461
Chemotherapy, intracardiac non-Hodgkin's lymphoma resolved by (CR); 401
Chest radiography, role in diagnosis of common congenital heart defects; 334
Children, in developing country, rheumatic fever in; 119
MRI measurements of cardiovascular structures in; 37
PVC MRI measurement of pulsatile blood flow in; 104
selective aspects of cardiac tumors in; 299
Chinese, distribution of congenital heart disease in infants and children; 148
Chromosome 22q11 microdeletions, cytogenetic testing with FISH for (LE); 183
Chronic lung disease, pulmonary artery pressure in very low birth weight infants and; 452
Chronic rheumatic mitral regurgitation, surgical intervention timing in children with (A); 377
CoaguChek PT/INR monitor, anticoagulation therapy in outpatient clinic and home setting monitored by; 347
Coarctation of aorta, in Turner syndrome, balloon dilatation of (CR); 474Staphylococcus aureus aortitis with pseudoaneurysm of aorta formation in child with; 263
stent implantation for (CR); 483
Color flow Doppler echocardiography, before and after embolization of arterial fistulas; 253
Common pulmonary vein atresia, diagnostic and therapeutic challenge of (CR); 490
Complications, of radiofrequency catheter ablation for arrhythmias; 508
Computed tomography, high-resolution, pulmonary hemodynamics in congenital heart disease evaluated by; 202
Computers, pediatric cardiology and progress in development of; 324
Congenital arteriovenous fistula, between subclavian artery and subclavian vein, congestive heart failure and (CR); 269
Congenital atrioventricular block, permanent pacemaker implantation in premature infant with (CR); 470
Congenital heart defects, accuracy of examination for, with and without electrocardiography and x-ray; 334
rate control of junctional tachycardia after repair of; 123
sequential approach to describing (A); 140
Congenital heart disease, blood flow measurements by MRI in; 47
comparison of fetal echocardiography in university and HMO settings for detection of; 234
enteral nutritional support by percutaneous endoscopic gastrostomy in children with; 341

frequency and clinical profile of Chinese children with; 148
high-resolution CT in evaluation of pulmonary hemodynamics in; 202
MRI assessment of cardiovascular anatomy in; 18
MRI assessment of physiology and function in; 59
plasma nitric oxide products correlate with cardiac index of; 378
radiofrequency catheter ablation of tachycardia in patients with; 557
respiratory syncytial virus in children with; 433
segmental approach to diagnosis of (A); 118
Tei index measures right ventricular function in; 416
ventricular arrhythmias and; 524
with intrauterine growth retardation, component of Johanson-Blizzard syndrome (CR); 389
Congenital heart surgery, in Sweden, centralization of; 353
Congestive heart failure, in infant with congenital subclavian arteriovenous fistula (CR); 269
in neonate with congenital coronary artery fistula (CR); 275
Coronary artery fistula, echocardiography guidance for transcatheter coil embolization of; 253
left ventricular aneurysm associated with (CR); 172
Coronary spasm, after percutaneous transluminal coronary rotational ablation for coronary stenosis (CR); 500
Coumadin, low-molecular-weight heparin for long-term anticoagulation compared with (A); 346
monitoring of (A); 373
Critical pulmonary valve stenosis, catheter closure of atrial septal defect after balloon valvuloplasty for (CR); 170
Cyanosis, pulmonary arteriovenous fistula in children as cause of (CR): 493
Deaf-mute children, ventricular repolarization and Jervell and Lange-Nielsen syndrome in; 135
Developing country, retrospective study of rheumatic fever in children in; 119
Diet, protein-losing enteropathy and Fontan operation treated with (LE); 292
Diphtheria, febrile throat infection and atrioventricular block in child with (CR); 282
Display techniques, multidimensional image volume reformatting and; 27
Doppler echocardiography, contribution to ventricular filling in fetus of E and A flow waves measured by; 422
left-to-right shunt in congenital heart disease quantitated by; 240
pulmonary artery pressure of very low birth weight infants assessed by AT:RVET(c) measured by; 452
right ventricular diastolic function evaluated by; 358
Doppler techniques, accuracy of in determining pressure gradient and location of stenosis in Blalock-Taussig shunt; 439
Down's syndrome, heart defects in Chinese children with; 148
Dysphonia, supracardiac total anomalous pulmonary venous connection and; 458
Dysrhythmia, perinatal, isolated congenital left ventricular diverticulum with (CR); 175
Echocardiography, baseline, exercise capacity of aortic regurgitation pediatric patients and; 328
Doppler, right ventricular diastolic function evaluated by; 358
fetal, at university and HMO settings, comparison of timing and outcomes of; 234
fetal, in ectopia cordis; 249
left ventricular systolic and diastolic functions in juvenile rheumatoid arthritis patients measured by; 374
normative data on cardiovascular structures obtained by; 37
transesophageal, coil embolization of congenital coronary arterial fistula monitored by; 253
transesophageal, surgical closure of coronary artery fistula guided by (CR); 275
two-dimensional, quadricuspid pulmonic valve diagnosed in live newborn by (CR); 279
use of electrocardiography and x-ray for congenital heart defects diagnosed after; 334
Ectopia cordis, fetal echocardiography of; 249
Electrocardiography, flecainide treatment for fetal tachycardia caused unusual findings in; 259
long QT syndrome in congenitally deaf children detected by; 135
of HIV-infected children, rhythm and conduction abnormalities in; 189
role in diagnosing mechanisms of tachycardia; 551
role in diagnosis of common congenital heart defects; 334
Electrophysiology, 507
Emergency pacing, of premature infant followed by pacemaker implantation (CR); 470
Endarteritis, mycotic pseudoaneurysm of aorta caused by; 263
Enteral feeding, by percutaneous endoscopic gastrostomy in children with congenital heart disease; 341
Esophageal atresia, with TAPVC with varices and multiple drainage sites (CR); 289
Ethnicity, congenital heart disease occurrence and; 148
Exercise capacity, after total repair of tetralogy of Fallot; 211
in pediatric patients with aortic regurgitation; 328
Fetal echocardiography, at university and HMO settings, comparison of timing and outcomes of; 234
in ectopia cordis, 249
Fetal tachycardia, treated with flecainide, unusual electrocardiography in preterm infant after; 259

Fetus, contribution of Doppler atrioventricular flow waves to ventricular filling in; 422
Fibromas, cardiac, incidence, features, and imaging of; 299
intraluminal pulmonary artery, presenting as pulmonary stenosis (CR); 480
review of pathologic features of; 317
Flecainide, unusual electrocardiography in preterm infant after fetal tachycardia with hydrops fetalis treated with; 259
Flow dynamics, of stenotic modified Blalock-Taussig shunt; 439
Fluid mechanics, in congenital heart disease, MRI techniques for assessing; 59
Fluorescence in situ hybridization, performance of evaluated by review of characteristics of patients for cytogenetic testing (LE); 183
Fluoroscopy, MR, catheter tracking and visualization techniques for; 80
Fontan operation, diet treats protein-losing enteropathy after (LE); 292
Fontan procedure, high altitudes and (A); 239
Fractal scaling, sudden death predicted by heart rate variability assessment using (CR); 403
Full term neonates, spontaneous closure of atrial septal defects in; 129
Fulminant myocarditis, percutaneous cardiopulmonary support for treatment of (CR); 158
Gastrostomy, percutaneous endoscopic enteral nutritional support for children with congenital heart disease by; 341
Gene transfer, to pulmonary artery of pigs via percutaneous angioplasty; 223
Genetics, of long QT syndrome, mapping and identification of; 542
Gestational age, E/A ratios for mitral and tricuspid valves and; 422
Gradient echo imaging sequence, overview of; 5
Heart block, progression from first degree to complete (CR); 502
Heart murmur, effects of electrocardiography and x-ray on accuracy of preliminary diagnosis of; 334
Heart rate variability, effect of age on; 411
sudden death predicted using fractal scaling of (CR); 403
Heparin, low molecular weight, coumadin for long-term anticoagulation compared with (A); 346
protein-losing enteropathy in tricuspid hypoplasia treated with (CR); 267
Histiocytoid cardiomyopathy, incidence and features of; 299
HLA B27, risk factor for cardiac damage in juvenile arthritis patients; 141
Home setting, evaluation of anticoagulation whole blood PT/INR monitoring of children in; 347
Human immunodeficiency virus type 1, electrocardiography and Holter monitoring in children infected with; 189
Hydrops fetalis, treated with flecainide, unusual electrocardiography in preterm infant after; 259
Idiopathic recurrent pericarditis, colchicine treatment of corticosteroid-dependent adolescents with (CR); 395
Immunization, against diphtheria, importance of (CR); 282
Immunoglobulin, high-dose intravenous, cardiac troponin I in adenovirus myocarditis treated by (CR); 391
Infants, congenital subclavian artery to subclavian vein fistula in (CR); 269
MRI measurements of cardiovascular structures in; 37
positron emission tomography of myocardial perfusion after arterial switch operation in; 111
selective aspects of cardiac tumors in; 299
Information technology, effect on pediatric cardiology and cardiac surgery; 324
Infundibulum, in valvular pulmonary stenosis before and after balloon valvuloplasty, shortening patterns of; 448
Inhaled nitric oxide, clinical trial vs. clinical practice using (A); 274
references for (A); 278
Interventional catheterization, mammary artery bypass stenosis repaired by (CR); 161
Interventional magnetic resonance imaging systems, state of the art of and monitoring equipment for; 80
Intracardiac lymphoma, resolution by chemotherapy (CR); 401
Intracardiac tumor, in supravalvar intraluminal pulmonary artery (CR); 480
Intrauterine growth retardation, with congenital heart disease, component of Johanson-Blizzard syndrome (CR); 389
Jervell and Lange-Nielsen syndrome, identification of in deaf-mute children; 135
long QT syndrome genetics and; 542
Johanson-Blizzard syndrome, congenital heart disease in newborn with (CR); 389
Junctional tachycardia, postoperative, procainamide for rate control of; 123
Juvenile rheumatoid arthritis, left ventricular diastolic function in; 374
Kawasaki disease, complications of percutaneous transluminal coronary rotational ablation in (CR); 500
with severe coronary sequelae, heart rate variability predicts sudden death in child with (CR); 403
Left subclavian artery, isolated, right aortic arch with (CR); 497
Left ventricle, in neonatal heart, performance under volume loading and tachycardia; 216

Left ventricular aneurysm, right coronary artery to left ventricular fistula with (CR); 172
Left ventricular diastolic function, juvenile rheumatoid arthritis, echocardiography of; 374
Left ventricular diverticulum, perinatal dysrhythmia and (CR); 175
Left ventricular function, MRI assessment of normal range of values of; 37
Left ventricular to aorta conduit, closed using Amplatzer duct occluder (CR); 180
Left-to-right shunt, in congenital heart disease, radioangioscintigraphy and Doppler echocardiography measurement of; 240
Long QT syndrome, ventricular repolarization in deaf-mute children and; 135
Magnetic resonance imaging, after repair of tetralogy of Fallot, clinical applications of; 70
blood flow measurements in congenital heart disease by; 47
cardiac function in congenital heart disease assessed by; 59
cardiovascular anatomy assessed by; 18
fast cardiovascular, state of the art and diagnostic and interventional applications of; 80
normal range of cardiovascular structures measured by; 37
phase velocity cine, pulsatile blood flow in children and adolescents measured by; 104
physics of; 5
reconstruction of pediatric cardiovascular disorders from data sets of; 27
role in cardiologic diagnosis; 3
unroofed coronary sinus detected by (CR); 382
Mammary artery bypass grafting, Bland-White-Garland syndrome with stenotic origin of left coronary artery treated by (CR); 161
Marijuana, atrial fibrillation associated with (CR); 284
Mortality, during and after centralization of pediatric heart surgery in Sweden; 353
Mycotic pseudoaneurysm of aorta, antibiotic therapy and emergency surgery for; 263
Myocardial infarction, after percutaneous transluminal coronary rotational ablation for coronary stenosis (CR); 500
Myocardial injury, perioperative, role of adrenomedullin in preserving; 228
Myocardial perfusion, after arterial switch operation, positron emission tomography evaluation of; 111
Myocardial relaxation, comparison of right and left ventricles of neonatal pig heart show similarities in; 216
Myxomas, cardiac, incidence, features, and imaging of; 299
review of pathologic features of; 317
Native aortic coarctation, in Turner syndrome, balloon dilatation of (CR); 474
stent implantation for (CR); 483
Neonatal cyanosis, cardiac masses and tricuspid regurgitation as cause of (CR); 271
Neonatal pig heart, direct comparison of right and left ventricles under volume loading and tachycardia; 216
Neonates, catheter closure of atrial septal defect in (CR); 170
routine pulse oximetry screening for (A); 227
surgical closure of congenital coronary artery fistula in (CR); 275
Neuromonitoring, cerebral effects of balloon dilatation and brain recovery assessed by; 461
Nifedipine, multiple intrapulmonary arteriovenous fistula in children treated by (CR); 493
Nitric oxide products, cardiac index in children with congenital heart disease and levels of; 378
Non-Hodgkin's lymphoma, chemotherapy for cardiac metastases of (CR); 401
Normal hearts, identifying ventricular arrhythmias in; 524
Nutritional status, of children with congenital heart disease, percutaneous endoscopic gastrostomy for improvement of; 341
Open heart surgery, plasma adrenomedullin correlates with myocardial preservation during; 228
Outpatient clinics, evaluation of anticoagulation whole blood PT/INR monitoring of children in; 347
Pacemaker, permanent implantation of in premature infant (CR); 470
Patent ductus arteriosus, right aortic arch with isolated left subclavian artery and (CR); 497
PediHeart, initial annotation on (A); 215
Percutaneous endoscopic gastrostomy, enteral nutritional support for children with congenital heart disease by; 341
Percutaneous transluminal rotational ablation, complication in Kawasaki disease (CR); 500
Pericardial effusion, subxiphoid pericardial drainage of; 363
Pericarditis, etiology, presentation, management, and prognosis of; 363
recurrences of corticosteroid-dependent idiopathic pericarditis prevented by (CR); 395
Persistent ductus arteriosus, spontaneous closure of atrial septal defects and presence of; 129
Persistent left superior vena cava, unroofed coronary sinus associated with (CR); 382
Phase contrast magnetic resonance imaging, principles, performance, validation, and applications of; 47
Phase velocity cine magnetic resonance imaging, principles, performance, validation, and applications of; 47
pulsatile blood flow in children and adolescents measured by; 104

Physics, of magnetic resonance imaging for cardiac magnetic resonance; 5
Plasma DNA, pulmonary artery gene transfer via percutaneous angioplasty using; 223
Positron emission tomography, myocardial perfusion after neonatal arterial switch operation evaluated by; 111
Potassium channel α and β subunit genes, role in long QT syndrome; 542
Pregnancy termination, fetal echocardiography at university vs. HMO and rate of; 234
Premenarcheal girls, normalization of maximal cardiovascular variables for; 429
Preterm infants, emergency pacing and permanent pacemaker implantation in (CR); 470
spontaneous closure of atrial septal defects in; 129
unusual echocardiography in after fetal tachycardia with hydrops fetalis treated with flecainide; 259
Proarrhythmia, antiarrhythmic drugs and; 576
Procainamide, rate control of postsurgical junctional tachycardia by; 123
Prosthetic tricuspid valve thrombosis, human recombinant tissue plasminogen activator for thrombolysis of (CR); 397
Protein losing enteropathy, after Fontan operation treated with diet (LE); 292
in tricuspid hypoplasia, heparin therapy reverses (CR); 267
Pulmonary arteriovenous fistula, nifedipine for treatment of (CR); 493
Pulmonary artery, MRI assessment of normal range of values of; 37
naked plasma DNA delivered by angioplasty for gene transfer to; 223
Pulmonary artery band, balloon dilatation of (LE); 407
Pulmonary artery pressure, in patients with isolated ventricular septal defect, noninvasive prediction of; 197
in very low birth weight infants, pulsed Doppler echocardiography of; 452
Pulmonary atresia, associated with multiple cardiac rhabdomyomas in tuberous sclerosis (CR); 165
Pulmonary hemodynamics, high-resolution CT in evaluation in; 202
Pulmonary hypertension, high-resolution CT for evaluation of; 202
predictive value of noninvasive methods for assessment of; 197
Pulmonary insufficiency, after tetralogy of Fallot repair, effect on ventricular function; 244
Pulmonary lymphangiectasia, following surgery for common pulmonary vein atresia (CR); 490
Pulmonary outflow tract obstruction, occurrence in Chinese children; 148
Pulmonary regurgitation, isolated absence of pulmonary valve cusp and (CR); 487
magnetic resonance velocity mapping of; 70
Pulmonary steal phenomenon, after closure of patent right ductus arteriosus (CR); 497
Pulmonary stenosis, intraluminal pulmonary artery fibroma presenting as (CR); 480
Pulsatile flow phantom, blood flow rates measured by; 104
Pulse oximetry screening, for neonates (A); 227
Pulse sequences, description of and imaging strategies using; 18
overview of; 5
Purkinje cell tumor, review of pathologic features of; 317
Purulent pericarditis, from Streptococcus, pseudoaneurysm of ascending aorta formed in child with; 263
QT variability, effect of age on; 411
Quadricuspid pulmonic valve, in live newborn, 2D echocardiography diagnosis of (CR); 279
Radioangioscintigraphy, left-to-right shunt in congenital heart disease quantitated by; 240
Radiofrequency ablation, real-time MRI used for; 80
Radiofrequency catheter ablation, arrhythmias surgery incorporates concepts of; 534
indications and complications of; 508
of tachycardia in patients with congenital heart disease; 557
Radionuclide angiocardiography, ventricular function in pulmonary insufficiency measured by; 244
Reentrant arrhythmia circuits, Maze procedure for correction of; 534
Reentrant circuit mechanisms, of tachycardia diagnosed by electrocardiography; 551
Respiratory syncytial virus, in patients with congenital heart disease, epidemiology and preoperative screening of; 433
Respiratory syncytial virus antigen screening, of children before cardiac surgery, effectiveness of; 433
Rhabdomyomas, cardiac masses causing transient neonatal cyanosis consistent with (CR); 271
cardiac, features and spontaneous regression of in infancy and childhood, 299
Rheumatic fever, in developing country, clinical presentation, cardiac involvement, and outcome of; 119
Right aortic arch, isolated left subclavian artery and bilateral patent ductus arteriosus (CR); 497
Right ventricle, in neonatal heart, performance under volume loading and tachycardia; 216
Right ventricular diastolic function, Doppler echocardiographic evaluation of; 358
Right ventricular function, in normal heart and congenital heart disease, Tei index measures performance of; 416
MRI assessment of normal range of values of; 37

Right ventricular systolic dysfunction, with aortic origin of right pulmonary artery, preoperative management of (CR); 388
Risks, of radiofrequency catheter ablation for arrhythmias; 508
Romano – Ward syndrome, mapping and identification of long QT syndrome genes in; 542
Segmental approach, cardiac anomalies described by Baharati and Lev by (A); 128
cardiac connections, relations, and morphology described by Anderson et al. by (A); 147
cardiac morphology described by van Praagh by (A); 118
diagnostic coding for computerized storage and retrieval based on (A); 160
Selective coronary angiography, in pediatric patients, techniques and complications of (CR); 285
Senning operation, Tei index in children after; 416
Sequential approach, cardiac morphology described by Tynan et al. (A); 140
Sodium channel gene, role in long QT syndrome; 542
Spondyloarthropathy, HLA B27-associated, cardiac involvement in; 141
Stenotic origin of left coronary artery, Bland-White-Garland syndrome and (CR); 161
Stent implantation, for native coarctation of aorta, balloon rupture during (CR); 483
Stent placement, real-time MRI used for; 80
Stroke volume, body surface area used to normalize maximal values of for body size; 429
Structural heart disease, catheter ablation therapy and surgical repair for; 534
Subxiphoid pericardial drainage, acute pericarditis treated by; 363
Sudden cardiac death, and ventricular arrhythmias, cause and prevention of; 524
arrhythmias from long QT syndrome as cause of; 542
Sudden death, in Kawasaki disease with severe coronary sequelae predicted by heart rate variability (CR); 403
Supraventricular tachycardia, antiarrhythmic drugs for; 576
radiofrequency catheter ablation for treatment of; 508
Syncope, cardiac, ventricular tachycardia and; 524
neurally mediated, impact, etiology, mechanisms of and current approach to; 514
Tachycardia, electrocardiogram in diagnosing mechanisms of; 551
in congenital heart disease, radiofrequency catheter ablation treatment for; 557
Tei index, quantitation of right ventricular function in normal heart and congenital heart disease using; 416
Teratomas, review of pathologic features of; 317
Tetralogy of Fallot, clinical applications of cardiac magnetic resonance imaging after repair of; 70
effect of pulmonary insufficiency on right and left ventricular function after repair of; 244
exercise capacity after repair of; 211
population-based study of diagnosis, intervention, and perioperative mortality for; 368
Therapeutic catheterization, MR-guided balloon angioplasty, stent placement, and radiofrequency ablation applied to; 80
Thrombolysis, of prosthetic tricuspid valve thrombosis with human recombinant tissue plasminogen activator (CR); 397
Tissue plasminogen activator, human recombinant, thrombolysis of prosthetic tricuspid valve thrombosis using (CR); 397
Tissue tagging, MRI technique to study ventricular blood flow in congenital heart disease; 59
Total anomalous pulmonary venous connection (TAPVC), dysphonia associated with; 458
with varices and multiple drainage sites and esophageal atresia (CR); 289
Transcatheter coil embolization, of coronary arterial fistulas, echocardiographic guidance of; 253
Transesophageal echocardiography, coil embolization of congenital coronary arterial fistula monitored by; 253
surgical closure of coronary artery fistula guided by (CR); 275
three-dimensional, atrial septal defect size measured by; 465
Transit time ultrasound flowmeter, blood flow rates measured by; 104
Transposition of great arteries, associated with multiple cardiac rhabdomyomas in tuberous sclerosis (CR); 165
myocardial perfusion after arterial switch operation for; 111
population-based study of diagnosis, intervention, and perioperative mortality for; 368
Tricuspid hypoplasia, heparin therapy reverses protein-losing enteropathy in (CR); 267
Tricuspid regurgitation, neonatal cyanosis caused by cardiac masses and (CR); 271
Troponin-I, myocardial injury assessed by release of; 228
Truncus arteriosus communis, aortopulmonary septal defect and (CR); 477
Tuberous sclerosis, cardiac rhabdomyoma in infants and children with; 299
cardiac rhabdomyomas and congenital heart defects associated with (CR); 165
Tumor necrosis factor α, in children with congenital heart disease, correlation with cardiac index; 378
Turner syndrome, balloon dilatation of native aortic coarctation in patients with (CR); 474

Two dimensional echocardiography, quadricuspid pulmonic valve diagnosed in live newborn by (CR); 279
Unroofed coronary sinus, magnetic resonance imaging detection of (CR); 382
Upright posture, pediatric syncope and; 514
Valvular pulmonary stenosis, shortening patterns of infundibulum in; 448
Velocity mapping, phase-encoded, blood velocity and flow in congenital heart disease measured by; 59
pulmonary regurgitation volume and right ventricular diastolic function measured by; 70
Ventricular arrhythmias, ventricular, prognostic and therapeutic considerations of and prevention of sudden cardiac death from; 532
Ventricular function, after tetralogy of Fallot repair, MRI measurement of; 70
effect of pulmonary insufficiency after tetralogy of Fallot repair on; 244
Ventricular mechanics, of right and left ventricles of isolated neonatal pig heart, direct comparison of; 216
Ventricular repolarization, in deaf-mute children, assessment of; 135
Ventricular septal defect, associated with multiple cardiac rhabdomyomas in tuberous sclerosis (CR); 165
noninvasive predictions of pulmonary artery pressure in; 197
radioangioscintigraphy and Doppler echocardiography of left-to-right shunt in; 240
Ventricular tachycardia, congenital heart disease and; 524
medication for prevention of; 576
Very low birth weight infants, serial pulsed Doppler assessment of pulmonary artery pressure in; 452
Volumetric reconstructions, of multidimensional MRI of cardiovascular disorders; 27
